

XM Satellite Radio is the best thing to happen to driving in years. To be able to turn to one source and get all the information you need is fantastic. Think about it - you get the same TV stations, CBS, NBC, etc across the US, but when it comes to radio - its different. XM lets me get the same information no matter where I am at. Please let XM continue to deliver the service that sets them apart from radio, something I am willing pay for and something radio stations should have no say in. Please reject NAB petition 04-160.

Respectfully,

George Blakely
